New Product – Key Facts

Product:

Offset Snips 20SL & 20 SR

Application:

Two versions of Offset Snips. 20SL cuts straight and left curves. 20SR cuts straight and right curves.

Offset blades

- The main feature of the offset blades is that during the cutting process your hand will be kept safely above the work.

Cold-formed blades

- Cold-formed blades are 44% stronger than hot forged blades and requires 25% less cutting force because of more accurate blade tolerances.

Compound leverage

- Compound leverage means reduced pressure and faster and easier cutting.

Safety latch

- Easy push-up safety latch allows one-handed operation.

Long life spring

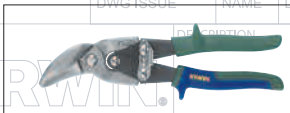
- Long life spring for increased durability and reliability.

Extra strong splines

- 2,66 mm alloy steel spines provide increased rigidity and less flexing.

Soft grips

- Over-molded Pro-touch soft grips provide superior comfort. Resists twisting and will not come off.



20SR Green grips for straight cuts and tight curves to the right

20SL Red grips for straight cuts and tight curves to the left

Reduced hand span

- 10% reduced hand span increases control and decreases fatigue.

Cutting Capacity

SKU	Mild Steel	Stainless steel	Length of cut
20SL & 20SR	1,19mm	0,84mm	3,02cm
